

Notes from St Luke's School January 2026

While the weather has been chilly and changeable throughout January, the pupils of St Luke's have been full of energy and enthusiasm to kick off the new year!

4th Class have been enjoying the STEAM programme with Wesley Bateman every Friday. This is an introduction to engineering, and 4th have been busy making wind turbines. Boats and other constructions!

Our senior classes recently took part in an excellent talk with Ger Brick on social media and how to stay safe online. Some excellent advice was given on keeping accounts private and changing your passwords regularly!

If you walked past the Canon Packham Hall on Friday Jan. 16th, you may have heard our fantastic African Drumming classes taking place- loud but fun! . All classes had a drumming workshop, which included drumming, chanting and a little bit of dancing to work off that Friday energy!

We were delighted to welcome Charlie McBurney from Hope Foundation to our Assembly on Tuesday Jan. 20th. She spoke about the work of the Foundation in Kulkata and showed many photographs and slides. Charlie accepted a cheque from our dress-up day last October, where we raised €540! Following on from this talk about helping others, our first class led a beautiful assembly on Tuesday Jan 27th. They spoke about the importance

of being generous and taught the school about St Brigid and her wonderful work with people in need.
